Reasons for Allowance

Examiner acknowledges a submission of the amendment filled on 11/17/06. Claim 7 has been kept original, claims 6 has been amended, claims 5 & 13-17 have been previously presented and no claims have been cancelled. No new claims were added. It also included remarks/arguments.

The following is an examiner's statement of reasons for allowance.

Claim 5: the closest references are: "Ion Generator for a Combustion Device" Motouchi US Patent 5977716 issued on November 02, 1999 and "Modular Glow/Corona Discharge Device" Kanter US Statutory Invention Registration H286) published on June 02, 1987

These patents disclose:

Motouchi'716: an ion generator but not with the exact claimed configuration of poles and its parts. The ion generator with sawtooth-like pointed ends arranged linearly (Figs. 6, 7 element 32).

Kanter'H286 discloses a corona discharge surface treating method with a similar casing and with an intake and exhaust and further discloses a cylindrical inner electrode (Fig. 1 element 19) and the plate-like poles place around the cylindrical one (Fig. 1 elements 21).

The references do not disclose:

The first pole pointed ends extending in a direction away from the second pole and not toward it.

As a result for claims 6-7 & 13-17 the allowability resides, at least in part, in the above-described limitations, in combination with the other elements of each of the claims, which has not been disclosed in or rendered obvious by the Prior Art.

Art Unit: 2836

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
